

Fire Safety Guidelines for Winter

- ✓ When using a space heater or room heater with an exposed heat source, avoid placing clothing or laundry on the heater, to prevent the heater from catching on fire. Coil room heaters are prohibited at the Weizmann Institute.
- ✓ When using gas or kerosene heaters, open a window to allow circulation of fresh air.
- ✓ Avoid overloading the electrical system: Do not use multi-socket adaptors or extension cords.
- ✓ Don't try to be an electrician! All electrical system malfunctions should be repaired by a qualified individual only.
- ✓ Do not leave heaters on without supervision.
- ✓ Place heating devices at a distance from flammable items, such as curtains, trashcans, etc.
- ✓ In case of fire, act immediately to extinguish it, call the emergency hotline at 2999 and report it.

Have a warm and safe
winter!
