

MENTORING PROGRAMS

For women Msc, PhD students & postdoctoral fellows

PROGRAM 1

One-to-one basis meetings

Give support and encouragement to carry out the best research you can within the limitations of your personal circumstances (family, children, anything else). The women mentors are scientists at the Weizmann Institute in various disciplines willing to help younger female scientists (at different stages of their career) by sharing their own experiences.

PROGRAM 2

WISeMom

One-to-one mentoring given by mother student or postdoc

Incorporate academic career with the all-consuming role of motherhood or pregnancy can seem overwhelming. In this project, new moms will be paired with an experienced mom, that will be there for questions, consultation and support from her experience.
